QuickRef

References to various tool/language common actions, tips, or anything fairly useful.

Tools/Programs

- Git
- nginx
- PostgreSQL
- rsync
- WireGuard

Misc

Extract pages N from pdf and save to new pdf. `<range>` is a comma-seperated list of either single pages or page ranges.

```
qpdf --empty --pages report.pdf <range> -- print.pdf
```

Bind remote-localhost service on specific port to local-localhost specific port

```
ssh -L [localport]:[localhost]:[remoteport] remoteuser@remoteaddress
```
