

Zero Ranger

Zero Ranger is a shmup from 2017 that I recently found and have been having fun with. It runs on stock wine out of the box and is playable, however there are some tweaks that improve the quality of the experience.

NVIDIA-based machines may have difficulty with running this. Ive had both dxvk and stock have behavior issues. That being said, currently I run on stock due to framedrop issues with dxvk (this has not been checked in a while).

Playability	Platinum
Tweak Effort	Minimal
Storefronts	itch.io

Necessary Tweaks

- winecfg: force window/desktop aspect ratio
- syspkg: install lib32 pulse/pipewire packages

Tested Machines

Host: Artix Linux Rolling

HW Class	Description
processor	Intel(R) Core(TM) i7-10750H CPU @ 2.60GHz
memory	16GiB System Memory
display	TU116M [GeForce GTX 1660 Ti Mobile]
